**EXERCISE 1. READ THE TEXT AND DO THE EXERCISES THAT FOLLOW.**

During cargo operations on a Very Large Crude Carrier (VLCC), the Chief Officer asked an AB to check the condition of a ballast tank. The tank had been closed for several weeks. The AB opened the hatch and climbed down without testing the atmosphere or wearing a gas detector. A few minutes later, he collapsed due to lack of oxygen. Another AB entered the tank to help him and was also overcome. The alarm was raised, and the rescue team used breathing apparatus to recover both men. One crew member survived, but the other later passed away in hospital. The investigation showed that the enclosed space entry procedures were not followed, and no permit to work had been issued.

True or False? (0,6)

- The incident took place while the ship was handling cargo. ....
- The tank had been ventilated before entry. ....
- No equipment was used to check the atmosphere. ....
- Two ABs entered the space together, but one lost consciousness due to oxygen deficiency.....
- Both crew members were able to return to duty. ....
- The job had been authorised using the correct approval system. ....

Name three safety procedures as steps to prevent an accident like the one described in the text above. (0,6)

1. You must \_\_\_\_\_  
\_\_\_\_\_
2. \_\_\_\_\_  
\_\_\_\_\_
3. \_\_\_\_\_  
\_\_\_\_\_

**EXERCISE 2. WRITE THE CORRECT MESSAGE MARKER TO INTRODUCE THE FOLLOWING SENTENCES. [1]**

- |  |  |
|--|--|
| • ..... MV Mani, this is MV Jupiter, turn your vessel to windward.       | • ..... Arrange for provisions to be delivered on arrival. |
| • ..... The wind force is Beaufort 7.                                    | • ..... Uncharted rocks ahead of you.                      |
| • ..... Do not enter the fairway. This is VTS, do not enter the fairway. | • ..... My cargo is naphtha.                               |
| • ..... I require icebreaker.  | • ..... My ETD is 1200 UTC                                 |
| • ..... I will increase my speed.  | • ..... I will overtake.                                   |

**EXERCISE 3. WRITE THE MISSING WORDS. USE THE WORDS GIVEN. THERE ARE EXTRA WORDS. [1]**

**maintain, inventory, adjust, lookouts, trimming, draft, prolonged, ingress, attempt, entry, pliers, jettison, roadstead, expected, magnitude, impact, scrap, hoses**

- You use \_\_\_\_\_ to grip small objects and bend wire.
- In tankers, in ship-to-ship transfer of cargo, two ships come \_\_\_\_\_ in open sea and cargo is transferred manifold to manifold via flexible \_\_\_\_\_.
- Make a/an \_\_\_\_\_ in the logbook. Use the official logbook not the \_\_\_\_\_ one.
