**EXERCISE B. Match the phrases to make collocations. (1.3 p.)**

- plug .....(1).....
- occupational .....(2).....
- administer .....(3).....
- partial hearing .....(4).....
- ultraviolet .....(5).....
- sand .....(6).....
- snap-back .....(7).....
- auxiliary .....(8).....
- take immediate .....(9).....
- close-quarters .....(10).....
- fumigation .....(11).....
- chest .....(12).....
- countersign .....(13).....

- rays
- blasting
- boiler
- action
- first aid
- compressions in CPR
- the document
- accident
- loss
- zone
- situation
- the scuppers
- in a dry bulk carrier

**EXERCISE C. Circle the correct answer (DO NOT write it in the blanks). (1.2 p.)**

1. Part of the vessel was ..... into the oil spill.

- a. extinguished      b. submerged      c. classified

2. Officers must reassure that nothing ..... access to the lifeboats.

- a. issues      b. obstructs      c. consumes

3. The deck cadet asked for a ..... to dress his wound.

- a. bandage      b. prescription      c. resuscitation device

4. You need to wear a ..... to protect yourself from falling objects.
- a. hard hat                      b. harness                      c. shield
5. In refrigerated compartments, crewmembers should wear a ..... suit.
- a. thermal                      b. chemical                      c. welding
6. Ear ..... protect from low-level sound energy; they are inserted directly into the ear canal.
- a. helmets                      b. plugs                      c. muffs

**EXERCISE D. Fill in the abbreviations/acronyms with the words in English. (1.7 p.)**

**General**

SOPEP: .....  
 DSC: ..... UTC: .....  
 TSS: ..... INMARSAT: .....

**Telex**

B/L: ..... MSCA: ..... NT.WT.: .....  
 WSNP: ..... A/S: .....

**EXERCISE E. Write the sentences in telex form. Use only important words, short sentences, and abbreviations where possible. (0.7 p.)**

1. I will revert with the amount of missing cargo.  
 .....
2. The ship's estimated time of arrival is at 3 o'clock in the afternoon local time on Saturday 23<sup>rd</sup>.  
 .....
3. Our departure time is at 8 o'clock in the evening.  
 .....
4. The estimated distance travelled on Monday the 16<sup>th</sup> of Nov was 240 nautical miles.  
 .....

**EXERCISE F. Match the two columns to give orders in sentences. (1.1 p.)**

|                  |  |
|------------------|--|
| 1. take ...      | <input type="checkbox"/> the auxiliary pump          |
| 2. fill ...      | <input type="checkbox"/> soundings                   |
| 3. transfer ...  | <input type="checkbox"/> a barge                     |
| 4. operate ...   | <input type="checkbox"/> from No.1 tank to No.2 tank |
| 5. order ...     | <input type="checkbox"/> a safe working pressure     |
| 6. keep ...      | <input type="checkbox"/> the pumpman                 |
| 7. open ...      | <input type="checkbox"/> spill                       |
| 8. instruct ...  | <input type="checkbox"/> the scuppers                |
| 9. plug ...      | <input type="checkbox"/> valves                      |
| 10. clean up ... | <input type="checkbox"/> the tank                    |
| 11. complete ... | <input type="checkbox"/> the oil record book         |

**EXERCISE G. Accident case: Slippery when wet.**

**A) Read the case below and fill in the missing words in the summary sentences that follow.**

**(1.8 p.)**

**Narrative**

The duty AB had just come on duty in port when he was assigned to lashing/unlashing operations. This involved using a portable aluminium ladder to climb on top of containers to carry out the required task. The AB was alone and unassisted during this task.

The weather was overcast; in fact it had rained recently, leaving the decks wet and slippery.

**The Lessons**

1. The Code of Safe Working Practices for Merchant Seamen stipulates that portable ladders should be properly secured against slipping or shifting, yet this was not practised.

The AB propped the portable ladder against the container and, without securing it, climbed up to lash the container. The ladder slipped from underneath him. The AB fell from the top of the container and landed on his feet, which resulted in a compound fracture to his left leg.

As he was working alone, there was nobody to assist him immediately. However, he was fortunate that his personal radio survived the fall and this enabled him to call for assistance. Being in port, he was also lucky to have immediate access to medical attention.

2. If working at a height of more than 2 metres, a safety harness with a life line should be worn. However, as in this case, where this was not possible due to the nature of the work involved, consideration should be given so that at least two people are involved in this kind of operation.

1. The accident happened in .....
2. The duty of the AB was to ..... a container.
3. The AB fell off a ..... and broke his leg.
4. He used a portable ladder which he hadn't .....
5. The decks were wet and ..... due to prior rain.
6. He used his ..... to call for assistance.
7. The injured man was given ..... attention relatively quickly because the vessel was in port.
8. We was working at a significant height but a safety ..... could not be used in this particular case.
9. There are two things that should have been done: firstly, securing the ladder against slipping and secondly, ..... two people to this operation / duty.

**B) The following phrases come from the text. What do they mean? Choose the correct alternative.**

**(1 p.)**

1. "he was assigned"  
a. he was given some work (a task) to do  
b. he was relocated to another duty
2. "unassisted"  
a. isolated  
b. not helped by anyone
3. "propped (the ladder) against (the container)"  
a. attached (the ladder) to (the container)  
b. supported (the ladder) by leaning it against (the container)
4. "stipulates"  
a. analyzes in depth  
b. states clearly and firmly how something must be done
5. "consideration should be given"  
a. careful thought (when you are planning or deciding something) should be given  
b. priority (when you are planning or deciding something) should be given
