**A. STATE IF THE FOLLOWING SENTENCES ARE TRUE or FALSE. (30p)**

	The content of a navigational warning does not need to include the date and time of issuance.
	Navigational warnings are only relevant for coastal areas and not for open sea navigation.
	Drift ice is stationary and attached to the coast ice.
	Slower speeds can help vessels navigate more safely through ice-covered waters.
	Propellers and rudders are the most vulnerable parts of the ship.
	A frostbitten part should be massaged or rubbed with snow.
	Seafarers joining a ship are responsible for arranging their own transportation and paying the travel expenses to the port of embarkation.
	Check-in is the process of passengers leaving the aircraft after landing.
	When a team is working on deck in heavy weather, manropes must be laid and the team members must be fastened together.
	A permit-to-work is only necessary for high-risk ship operations and not for routine tasks.
	When the engines are on 5' notice, it means that they have paused for 5 minutes.
	Consequence and likelihood are the axes of the risk assessment matrix.
	The C/O implements Abandon Ship, Fire and SOPEP Plans if ordered.
	A 'no-blame culture' encourages individuals to stop reporting incidents.
	It is estimated that there are about 600 near-misses for every serious injury.
	The swivel can also be connected directly to the anchor.
	Surface smoothness is needed if we want the paint coating to have adhesion.
	Different cultural modes can give contradictory sense to physical gestures.
	One of the main objectives of BRM is to help bridge team members interact with and support the master and/or the pilot.
	Among others, a ship auditor has to find and report deficiencies to the company.

**B. COMPLETE WITH THE RIGHT PREPOSITION. (15p)**

- A ship manned \_\_\_\_\_ multinational crew.
- Be sensitive \_\_\_\_\_ cultural differences.
- \_\_\_\_\_ the time of the disaster.
